Summary

BCA graduate pursuing MCA with hands-on experience building end-to-end web applications, scalable backend systems, and data-driven solutions, backed by a 400-hour Certified Specialist program in Data Science and Analytics (ICT Academy of Kerala, scored 30/30). Experienced in leading teams from design through final delivery and deploying applications live. A fast learner with strong problem-solving and analytical skills, recognized with a Best Performer Award for reliability and consistent growth.

Technical Skills

Languages: Python, JavaScript, TypeScript, Java, PHP, C, C++, SQL

Data & AI: Pandas, NumPy, Scikit-Learn, Machine Learning, Tableau, Generative AI, Prompt Engineering

Python & Web Frameworks: Django, Django REST Framework, Flask, REST APIs

Databases: MySQL, PostgreSQL, MongoDB, Redis, SQL Database Design & Optimization

Front-End: React.js, Next.js, HTML5, CSS3, Bootstrap, Tailwind CSS

Tools & Deployment: Git/GitHub, GitHub Actions (CI/CD), Docker, Render, Netlify, VS Code

Soft Skills

Communication & Collaboration, Problem Solving, Fast Learning, Time Management, Team Leadership

Experience

Full Stack Trainee Developer Aug 2024 – Mar 2026

Logix Space Technologies Pvt. Ltd. (LinkUrCodes) *Chalakudy, India*

- Built and maintained front-end and cross-platform applications end-to-end using React.js, Flutter, Bootstrap, HTML, and CSS in an agile, campus-based engineering team.
- Collaborated with cross-functional peers and industry mentors to design, test, and deploy production-style features, balancing delivery speed with code quality.
- Recognized with the **Best Performer Award** for consistent technical growth, reliability, and active learning.

Python Full-Stack Development Training (Django + React + AI) May 2026 – Nov 2026

Camerin – Indian Institute of Upskill *In Progress*

- Undergoing hands-on professional training in Python full-stack development, building applications with Django, React, and AI integration, including REST APIs and relational database schemas.

Projects

CampyTeq – Multi-College Management Platform Ongoing

Python, Django REST Framework, PostgreSQL, Redis, Next.js, TypeScript, Docker

- Building a multi-tenant college management platform with a Django REST Framework backend, JWT authentication, 12 role-based access levels, and modules for attendance, exams, fees, payroll, and library, served through a Next.js dashboard.

QuickTask – AI-Powered Task & Productivity Platform Live Demo

React, Python, Scikit-Learn, WebSockets

- Built a platform combining task management, daily attendance, real-time WebSocket team chat, predictive AI productivity scoring, and automated PDF audit reports.

ZynkaraShift – Self-Hosted Platform-as-a-Service Jun 2026 – Jul 2026

Docker, GitHub

- Designed and built a zero-cost PaaS that deploys web applications directly from GitHub repositories or Docker images, featuring an AI-driven deployment copilot, custom multi-tenancy routing, and container orchestration.

Credit Card Fraud Detection System Academic Project

Python, Flask, Scikit-Learn, MongoDB, HTML, CSS, Render

- Led a 4-member team to build a machine-learning-based fraud detection tool, handling data processing, model integration, testing, and final delivery, deployed live with a prediction API.

Education

Master of Computer Applications (MCA) Jul 2026 – Jun 2028

Indira Gandhi National Open University (IGNOU) – Distance Learning *In Progress*

Bachelor of Computer Applications (BCA) Aug 2023 – Mar 2026

Nirmala College of Arts and Science, Calicut University – *Focus: Programming, Web Development, Machine Learning*

Certifications & Badges

- Certified Specialist in Data Science and Analytics – ICT Academy of Kerala, 400 hours, Score 30/30 (Mar 2026)
- Frontend Developer (React) & Software Engineer, Certificates of Accomplishment – HackerRank (2026)
- REST API (Intermediate), Certificate of Accomplishment – HackerRank (Sep 2026)
- Google Developer Program – Premium Tier; Skill Badges in API Security, BigQuery, Firebase, TensorFlow Lite (Jul 2026)

Achievements

- **Best Performer Award**, LinkUrCodes – recognized for outstanding technical growth and consistent dedication.
- Led teams of 7 and 4 members from design through final delivery on a hackathon project and an academic machine learning project.
- CPL Rank (Corporal), National Cadet Corps (NCC), 2019–2025 – NCC 'A' and 'B' certificates for leadership and discipline.
